

Wardance Farm and Callaway Rough Riders Present

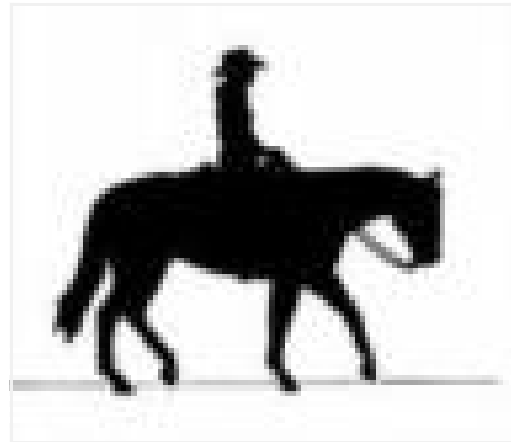

Natural Horsemanship Clinic

“Groundwork for a Better Ride”

October 12, 2008

1:00PM

At the Callaway Rough Riders Arena
Fulton, Mo

This natural horsemanship clinic will focus on communication between horse and rider starting on the ground. Groundwork is very important for you and your horse to learn to respect each other and know each others capabilities and limitations. For this reason we will be showing participants the proper approach to teaching their horse from the ground up. There will be a demonstration of our Natural Horsemanship Techniques in the round pen, followed by a chance for participants to practice these techniques. Under saddle work will follow but is optional to all participants.
